

Meter Service

Canadian Instrumentation Services Ltd. (CISG) understands the high demand placed on today's manufacturing facilities to improve the quality of their products. Certifying the accuracy of the metering equipment used in the manufacturing process has become mission critical.

CISG sells, repairs and provides custom modifications to panel and switchboard analog meters to meet a customer's precise requirements. All meters are tested for compliance with factory specifications with our unique capability to service meters from all types of manufacturers.

CISG provides specialty services such as polishing pivots and jewels and replacing taut band suspensions. Our meter modification program includes adding illumination, custom scale plates and ratings.

Let our expert technicians service and deliver calibration services that ensure accuracy to your specific industry requirements.

Meters of All Kinds
CISG provides customers with a one-stop supply and calibration partnership.
