

Dimensional

In the machining industry, certifying the accuracy of your equipment can help save money and time in rework. If you are concerned about the exact physical measurements of your equipment; Canadian Instrumentation Services Group Ltd. (CISG) can help.

We provide timely and efficient calibration services for your dimensional, test and measurement instruments.

CISG offers a unique **Asset Management Program**. We provide our customers with a certificate of calibration traceable to National Standards, calibration data and a calibration tag in accordance with ISO/IEC 17025. Asset management and instrument calibration history are available online via the CISG web site "E-Cert" program.

CISG offers dimensional calibration of Calipers, Dial Indicators, Force Gauges, Gap Gauges, Bore Gauges, Micrometers, Setting Rods, Plug Gauges, Protractors, Ring Gauges, Rules, Taper Gauges, Thickness Gauges, Thickness Standards, Scales and Balances.

Our calibration services cover a wide range of manufacturers such as Mitutoyo, Starrett, Brown & Sharpe, Moore & Wright, and Fowler

Let the expert technicians at CISG help you ensure the accuracy of your readings.
