

# E-Certification

To meet your exacting standards, Canadian Instrumentation Services Group Ltd. (CISG) offers a powerful new tool to complement our Asset Management Program. CISG introduces E-Certs – a fast and convenient online access to your calibration information.

For the testing, calibration and certification of your products, we provide a certificate of calibration traceable to National Standards, calibration data and a calibration tag in accordance with ISO/IEC 17025.

Asset management and instrument calibration history is available on-line via the CISG web site "E-Cert" program. We maintain all records.

Check your equipment calibration data any time, day or night.

From our CISG website, we provide a password that allows instant access to your calibration data any time of day.
