

Temperature

Inaccuracies in your temperature process can cost you money. Canadian Instrumentation Services Group Ltd. (CISG) can help.

We offer calibration of a complete range of temperature devices including but not limited to:
Mercury thermometers, Dial thermometers,
thermocouples, RTD's, Dry block calibrators and
Infrared thermometers.

CISG offers a unique **Asset Management Program**. We provide our customers with a certificate of calibration traceable to National Standards, calibration data and a calibration tag in accordance with ISO/IEC 17025.

Asset management and instrument calibration history are available online via the CISG web site "E-Cert" program.

We use state of the art Hart Scientific baths, SPRTs, and readouts with measurement uncertainties to 0.01°C from 0°C to 650°C.

We are the laboratory of choice for many of our customers who know they can depend on us for correct, complete, and timely calibrations at reasonable prices. Let the expert technicians at CISG help you ensure the accuracy of your readings.
